

Dynamix ***Dynamic Trim***

Dynamix offer an extensive range of trim colour including every major Jaguar and Daimler colour options, and all Connolly stock colours. In addition they apparently offer a carefully selected range of leather care/repair products, all of which are available from them via their website at www.dynamixdyes.com

They say the dyes are all produced to original manufacturer's specification and they also offer a free colour match service. These trade standard dyes restore the leather to its original condition as it would have left the factory.

These represent a cost effective restoration instead of replacement of trim parts. In addition, if people are going to keep their cars for longer, maintenance and restoration of leather is key to their enjoyment of ownership in the long term.

Before....

***...and after re-dyeing with
Dynamix products.***
