

# Leather Refurb

If your leather seats have got beyond the point where cleaning them makes a difference then you'll already know that shoe polish does little more than make a mess and get on your clothes. It's still possible to bring cracked and tired leather seats back to life though and Dynamix Dyes reckons it can provide factory quality dyes for BMW seats alongside a full range of other leather care and repair products. The firm also offers a free colour matching service and you'll find more details at [www.dynamixdyes.com](http://www.dynamixdyes.com).
